

# JobTrak

**Mobilise your work force: save time, money and improve your customer service with proven industry leading mobile worker and tracking solutions.**

Having been the first to deploy "push" mobile applications in the UK, CMS has an unrivalled level of experience in the development and deployment of field based mobile worker and tracking applications. Companies large and small have benefited from these solutions including Christian Salvesen, Royal Mail, Birmingham City Council, Enterprise plc and Hampshire County Council.

By combining these technologies with a simple to use web based job booking and control system, JobTrak is the first "off the shelf" mobile workforce management system. Built in flexibility enables JobTrak to be configured to any industry sector and comprehensive reporting and integration options ensure a best fit for any organisation.

Fully integrated with vehicle and PDA tracking mobile workers and their vehicles can be tracked every 60 seconds using our SupaTrak web mapping and reporting system.

JobTrak comes with the following list of impressive features:

- Book, control and send jobs to your mobile workforce via a simple to use web interface
- Works on any Windows Mobile PDA
- Fleet management with daily vehicle checks and mileage recording
- Real time job status reporting including signature capture and photographs
- One touch satellite navigation with integrated TomTom
- Track your work force and their vehicles with 60 second updates as standard
- Two way messaging to/from mobile workers
- Integrated device options with built in GPS, voice, bar code scanning etc
- Optional rugged devices
- 24/7/365 telephone support

In summary, JobTrak allows you to send jobs to your mobile workers, tells you where they are, what they are doing but above all improves your productivity and saves you money.
