

SupaTrak, cost effective reliable vehicle tracking

Many companies are choosing to invest in tracking solutions, saving their businesses considerable cost, conforming to new government duty of care and taxation guidelines and above all taking control of valuable assets. If your business operates a fleet of vehicles, you can benefit by investing in a vehicle tracking solution from CMS Global Technologies. By knowing the precise location and speed of drivers and their individual driving behaviours you will be able to make substantial savings on fuel, servicing costs and overtime, as well as cutting out unnecessary and sometimes unauthorised journeys.

SupaTrak is a simple to use, cost effective tracking solution which is easy to install and scaleable to any size of organisation. Starting from only 69p per vehicle per day, SupaTrak is the most cost effective vehicle tracking solution available in the market place today. With 60 second updates as standard your entire fleet is visible on our web based mapping system accessed from any Internet connection.

SupaTrak provides users with the following list of impressive features as standard:

- No hidden charges, monthly fee includes installation, all hardware, network charges and lifetime warranty
- GPS location updates every 60 seconds for real-time monitoring of all vehicles
- Covert in-vehicle installations for maximum security
- Installed by our own team of employed engineers
- Unlimited access to our 'easy to use' web based mapping via any Internet connection
- Full training and 24/7/365 telephone support
- Comprehensive reporting including start/stop and historic 'snail trail'
- Market leading 'black box' GPS/GPRS modem designed and manufactured by CMS
- Combined GPS/GPRS antenna for reduced power usage

In house designed "black box" with compact design for covert install

Options to upgrade to integrated CANbus and Mobile Worker applications ensure your investment in SupaTrak is future proof and will adapt as your business requirements change. The following upgrade options are available:
